Corian surface

MAINTENANCE GUIDE

TO KEEP YOUR CORIAN COUNTERTOP IN GOOD SHAPE, YOU CAN FOLLOW THESE STEPS:

1. Use a soft cloth or sponge to remove dust and dirt from the surface of the countertop. Do not use abrasive powders or other harsh cleaners, as this can damage the surface
2. Wipe the countertop with a dry cloth to remove any residue of dirt and water.
3. Use a mild soap or cleaner to clean the countertop. Avoid aggressive cleaning agents, as they can damage the surface.
4. Rinse the countertop with clean water and then dry it with a dry cloth.
5. If the countertop has deep scratches or damage, you can use a Corian repair kit to fill the scratches and smooth the surface. Follow the instructions in the kit closely to ensure the best possible result.
6. Avoid placing hot pots and pans directly on the countertop, as this can damage the surface. Instead, use heat-resistant trivets, such as pot holders or heat-resistant cups.
7. Do not use sharp objects, such as knives or cutting tools, directly on the countertop, as this can damage the surface. Instead, use cutting boards to protect the countertop.
8. If the countertop becomes discolored or sun-bleached, you can use a soft, damp cloth with mild soap or cleaner to clean the surface. Then dry it with a dry cloth.
9. If the countertop gets stained with food or beverages, such as wine or coffee, you should remove the stains immediately by using a soft cloth with clean water. Then wipe the countertop with a dry cloth.
10. To maintain the shine and prolong the lifespan of your Corian countertop, it is recommended to apply a surface protectant or wax once a year. Follow the instructions on the product closely to ensure the best possible result.
