

MAINTENANCE GUIDE

Stone surface

MAINTENANCE GUIDE

TO KEEP YOUR STONE COUNTERTOP IN GOOD SHAPE, YOU CAN FOLLOW THESE STEPS:

1. Clean regularly with a soft cloth and water. Avoid using cleaners with abrasives or other sharp objects, as this can damage the surface.
2. Dry the countertop thoroughly after cleaning to avoid water spots.
3. Use a marble cleaner regularly to remove deep stains and discolorations. Always follow the manufacturer's instructions.
4. Protect the countertop with a surface protectant to make it resistant to stains and damage.
5. Avoid placing hot food directly on the marble countertop. Instead, use a heat-resistant trivet.
6. Avoid placing sharp objects on the countertop, as this can damage the surface.
7. Be aware that marble is a porous material, so it may be necessary to refresh the surface with a new layer of protectant a few times a year.
8. If the countertop develops deep scratches, it can be cleaned and polished by a professional to make it look new again.
